## **XPLORE PRO II** SLED/ATV TRUCK DECK

## FEATURES

---

The Xplore Pro II has the same solid infrastructure that we have built our decks on for over 20 years, but with a new side extrusion. The side extrusion encloses all wiring for the bullet LED lights and offers an easy grip profile to extend or pull your sides out. It also holds Supertrac at a 45 degree angle with 4 tie downs. This offers multiple tie down locations completely down the side of your Marlon Xplore deck.

Superglides are held in place at the outer sides of the deck, as we have incorporated the Superglide profile into our side extrusion to save room on the decks. LED bullet lights are strategically placed in the headache rack and under the deck with a heavy-duty toggle switch for lighting things up early in the morning and later in the day. Legs are adjustable to fit a long box or short box. Patented rear brake, signal and reverse light is embedded into rear loading bar, for safety and visibility.

New for 2022, the new Marlon headache rack will accommodate most newer model trucks and will work with the third tail light and rear-facing cameras.

## ABOUT US

The Marlon roots extend back 45 years as a distributor of recreational products for adventurers in British Columbia, Canada. As we matured in the marketplace, we identified a need to not only expand our offerings of recreational trailers and related accessories, but also innovate our own products to help address the specific needs of a growing customer-base in Canada and the USA.
